All Rights Reserved. TISSUE FUSION SYSTEM SMOKE EVACUATION PENCIL SMOKE EVACUATION SYSTEM To learn more about these and other innovative products, call 800 4486506 or visit ConMed.com. Trusted around the world, the versatility of the System 5000 meets a variety of procedurespecific energy output needs including General, Laparoscopic and Robotic surgery. Every unit features an ergonomic design and intuitive interface. There are no hidden menus to find and scroll through when in use. Features like userprogrammed memory settings and modes that automatically optimize energy output make using and adjusting these generators fast and simple. This mode is typically used in all forms of general and specialty surgery. Specialty General Surgery, Urology, Gynecology Lap Mode Lap Mode technology limits output voltages below 2,700 volts in all of the System 5000's. Prices are indicative only and may vary by country, with changes to the cost of raw materials and exchange rates. The first product was the disposable ECG monitoring electrode. The disposable electrode market was newly emerging at a time in the history of U.S. healthcare when disposable products were rapidly gaining acceptance. ConMed Corporation Company History Our mission is to improve the quality of healthcare by designing, producing, and marketing innovative, highquality products. As ConMed's business grew, so did its product line.

ConMed expanded into the electrosurgery. Terms and Conditions All ConMed products are manufactured and produced in compliance with the following quality system standards 21CFR 820, US FDA Quality System Regulation CMDCAS ISO13485 European MDD, Annex II and V All products may not be available for sale in your region. For information on. Electrosurgical Generators Argon gas cylinder D size with 33 cubic feet 934.46 liters capacity. 99.998% pure argon gas included. Empty argon gas cylinder D Size with 33 cubic feet 934.46. With 15' 4.57m cable. Bipolar, splashproof, omnidirectional.<http://www.hetairia.org/965p-dq6-manual.xml>

With 10' 3.05m cable. Disposable cover for footswitches NonSterile. Prices are indicative only and may vary by country, with changes to the cost of raw materials and exchange rates. Back to login Login here The System 5000 allows you to perform a myriad of procedures with just one machine. No other electrosurgical generator allows surgeons to customize the output characteristics as precisely as the System 5000. Unique modes on the System 5000 include the Fluids Mode, which provides an additional boost of energy in procedures taking place in a fluid environment, and the Laparoscopic Mode, which limits open circuit voltages to below 2,700 volts in all modes, reducing the potential risk of inadvertent burns from capacitive coupling. It delivers optimal clinical effects in all operational modes through the continuous synchronization of current and voltage. Additionally, the Advanced Digital Signal Processing architecture enables the system to sample current and voltage at over 450,000 times per second, adjusting the output accordingly to deliver consistent tissue effect. This minimizes the potential harmful effects of capacitive coupling, insulation breakdown, and unintended burns. Macro bipolar for more energy intensive bipolar applications. MFI continues to be a preferred trusted vendor to a range of hospitals, physicians, government entities, universities, individual patients, and all manner of customers. Our team is constantly expanding to bring our customers better service and more products to fit a range of needs. In addition to medical retail sales, MFI offers services including equipment calibration, repair, recycling, and more.
